

Unlock the power of our cutting-edge platform, navigating regulations within the product safety ecosystem.

Do you trust all data on the Internet
OR
the actual laws and regulations?

Other Solutions

- X** 75+ full-time employees researching regulations
- X** Manual data entry
- X** Manual updates
- X** Manually identified regulations
- X** Compliance only regulations
- X** Targeted industries
- X** No industry sorting
- X** AI provides answers for a single country, state, or topic
- X** AI aggregates information from many sources some of which may be outdated, incomplete, or incorrect.
- X** AI or search engines provide summaries, simplified explanations, or discussions but lack the full text of the regulations and may not provide enough depth.
- X** AI platforms present multiple interpretations from different sources which could result in conflicting information or confusion about which is correct.
- X** AI can explain terms and provide context, but the explanations may be simplified or generalized thereby missing key nuances in the law.
- X** Legal databases are per state and focus on case law
